

# Setting up a new Windows Pocket PC

1. Assemble and charge your new Windows Pocket PC.
2. Connect the Pocket PC to the server via USB.
3. In Pocket PC Creations on the server, ensure the Tracker Mobile project is open, then select *Project, Install* from the menus.
4. A dialog box is displayed:

5. Click Install to install Tracker Mobile and Pocket PC Creations on the Pocket PC.
6. Locate the *Mobile Data* icon on the Pocket PC and tap it to open it:

7. If asked, assign a unique unit ID to your Pocket PC, eg “Unit1”.
8. Select *Wireless Options* to display a screen in which you can enter connection setting details to enable your Pocket PC to connect back to Pocket PC Creations running on your server.
9. Set the connection details as follows:
  - enter your server address and password (if one has been set)
  - ensure the following options are ticked:
    - *Automatically connect to Internet*
    - *Receive new sessions upon connect*
    - *Allow remote assistance.*
10. Press the **Done** button to save the connection details.
11. On the Pocket PC, on the Mobile Data screen, you will now be able to see the *Tracker Mobile* icon. Tap the icon to open it, press the **Menu** button and select **Synchronise** to update your projects.

You are now ready to begin a new session.
