

Release 39 - The Highlights

Release 39 is now available, with an amazing total of 949 changes. Here are the top features in this release:

- Work has continued on the Water Hygiene module with many new screens and an offline app for data collection.
- Performance improvements have been made throughout the system.
- A ticketing system is now available in Alpha Tracker - based on the one we use ourselves to track your tickets.
- The new Invoicing screen lets you follow an invoice through from Projects Ready To Invoice to Issued Invoices, all from the same place.
- Quotation numbers are now five digits, allowing you to enter even more quotations in a year!
- You can now have Google static maps displayed in reports, based on the latitude and longitude of the Site and/or Project record.
- There are new ways to access and make diary appointments from the Projects screen, including a new Diary button and also a Schedule screen for booking multiple regular appointments.
- Alpha Tracker can now be integrated with Fast Lean Smart (FLS) for optimised scheduling of high volume, low value jobs.
- The Client Portal has had some performance improvements, especially on the Site List & Compliance Summary which now displays all sites for a client - whether or not there is a project marked as Show On Web for that site.
- The SQL reports you use for management information now support pagination and have been reformatted.
